## Randolph Air Force Base

AZ&B provided surveying and civil design services for a number of facilities located at Randolph Air Force Base for facility upgrades over a three year contract term. Facilities AZ&B provided design services for include: base headquarters, chapel, communications center, housing, and visiting officer quarters. Rehabilitation projects required AZ&B to undertake surveying of building surroundings for civil design improvements

- ✓ Developed civil portions of design build packages that were issued to contractors
- ✓ Worked closely with the Base Historical Officer to design improvements that maintained the integrity of the Base which was constructed in the 1930s
- ✓ Coordinated with the Architect to identify specific survey and design information needed for building surroundings and improvements
- ✓ Designed exterior access and parking for ADA compliance while meeting historic preservation goals
- ✓ Developed force protection and security measures for sensitive buildings
- ✓ Undertook initial investigation of on-site utilities for construction
